

How Much is the Rebate?

Tucson Water customers can receive \$200 per clothes washer.

Replace Your Clothes Washer Today

Tucson Water is offering a clothes washer rebate program to our residential customers to make high-efficiency clothes washers more affordable. The higher cost of high-efficiency clothes washers is recovered in less than three years by the savings you will see on your water, sewer, and energy bills. Our \$200 rebate can help you recoup the additional cost within the first year, depending on the model you choose.

Upgrading your clothes washer helps you save and helps conserve our community's water resources.

CLOTHES WASHER

Did You Know?

95% of Tucson Water single-family residential customers have clothes washers. While we can all appreciate the modern convenience of doing laundry at home, a family of four typically does nearly 300 loads of laundry each year! That's a lot of time and water spent keeping our clothes and household items clean. On average, clothes washers are responsible for 16% of the water used in homes. High-efficiency clothes washers can save you time, energy, and water.

How Much Can You Save?

Upgrading to a high-efficiency clothes washer can reduce water use by **85%**, saving more than 7,000 gallons of water and 352 kWh of energy per year over baseline models. Depending on your current clothes washer, replacing it with a high-efficiency model may save you as much as \$100 per year on your utility bills.

Do You Qualify?

The clothes washer rebate program is for Tucson Water single-family residential customers who purchase a clothes washer from a retailer in the Tucson Water service area and have their old machine removed and not used again. See the back of the rebate application for additional requirements and information. One rebate per customer, per household is allowed.

HOUSEHOLD WATER USE

Which Machines Qualify?

The Consortium for Energy Efficiency (CEE) specifies tiers of efficiency based on both water and energy use so that rebate programs and manufacturers can work together to offer efficient products. Tier 2 and 3 machines are the most water efficient and Tier 3 machines are the most energy efficient. Tucson Water will rebate any clothes washer that qualifies for CEE Tier 2 or Tier 3 at the time of purchase.

Before You Buy, Make Sure You Qualify

To ensure your machine qualifies, refer to the most recent Qualifying Product List available at cee1.org or visit www.tucsonaz.gov/water/rebate.
